Providing answers When a provider recommends palliative or hospice care, patients and their families will need your support and guidance. PMID: 34673530 Free PMC article. Liu Q, et al. End-of-Life Nursing Education Consortium (ELNEC) factsheet. While staffed by similar multidisciplinary teams of professionals and challenged by recruitment pressures and shortage of qualified candidates like elsewhere in healthcare, The difference in these two areas of care comes down to the place of curative treatment within each. What Is Palliative Care? Palliative care can be provided in conjunction with curative or life-prolonging treatment. When you’re ready with answers to their questions, you help them understand the care they’ll receive so they can make the best decisions possible. These early discussions allow patients to prepare for the possibility that treatment may fail, to decide how they want to make the most of remaining time, and to make informed choices that fit with their values and needs to optimize quality of life. Other medical care may continue as long as it is helpful. Hospice care is a subset of palliative care without curative intent, focusing instead on comfort. hospice care—Frequently asked questions. JMIR Public Health Surveill. In addition, the individual may be required to pay 5% of the Medicare-approved amount for inpatient respite care (temporary care for the individual provided in a hospice inpatient facility, hospital, or nursing home so that the caregiver can rest or take time off). (See Becoming a hospice or palliative care nurse.) Patients don’t have to give up their primary providers; palliative and hospice care teams will coordinate care with them. Liu Q, Zheng Z, Chen J, Tsang W, Jin S, Zhang Y, Akinwunmi B, Zhang CJ, Ming WK. 10 myths about palliative care. doi: 10.2196/29375. Hospice care is for patients, no matter their age, who have a terminal illness (such as, but not limited to, cancer, Alzheimer’s disease, cardiac disease, amyotrophic lateral sclerosis, stroke, and liver disease) with a prognosis of 6 months or less. Everyone works together with the person who is dying, the caregiver, and/or the family to provide the medical, emotional, and spiritual support needed” (NIH, 2017). Like palliative care, “Hospice care brings together a team of people with special skills—among them nurses, doctors, social workers, spiritual advisors, and trained volunteers. Sometimes, in the course of a serious illness, hope becomes less about the cure and more about living life as fully as possible. Center to Advance Palliative Care. Does a referral for palliative care mean the patient’s healthcare provider has given up hope for recovery? Centers for Medicare & Medicaid Services. Medicare Part B offers some palliative care benefits, and states offer varied Medicaid coverage of hospice and palliative care for people with limited incomes. Can pain medications used in palliative care lead to addiction? Addiction is not common. Services typically include physical care, counseling, medication, equipment, and supplies for the terminal illness and related conditions. Typically, “Hospice is provided for a person with a terminal illness whose doctor believes he or she has 6 months or less to live if the illness runs its natural course” (HIH, 2017). And nurses can address some of the most common questions patients and families may have. What Is Hospice Care? A good example is an older person with cancer. They consider the patient’s clinical condition, including the primary diagnosis and comorbidities. Palliative care can be helpful at any stage of illness and is best provided from the point of diagnosis” (NIH, 2017). According to the NIH, “It is important to remember that stopping treatment aimed at curing an illness does not mean discontinuing all treatment. The patient may no longer have therapeutic options or may have chosen not to pursue treatment because side effects outweigh benefits. Takeaways: Patients and their families may not understand the difference between palliative and hospice care. For any hospice patients, regardless of setting, professional assistance is always available by phone or in person. References Boen, J., “Palliative Care Is Not Just for Hospice Patients: Confusion between it and hospice means some get less care,” nextavenue, July 20, 2016, Retrieved at . Canadian Virtual Hospice. Encouraging discussions between the patient and family members may facilitate advance care planning and improve satisfaction with end-of-life care. Does palliative care hasten death?
